

Dear Colleagues:

We are thrilled to present a new program **Minimally Invasive Gynaecologic Surgery and Video Festival**. The morning of the first day will be lectures on relevant topics related to MIGS and in the afternoon we will host a hands on workshop that will be appropriate for not only students but also for practicing surgeons who wish to review some of their surgical skills. On the Saturday, we are devoting a full day to video presentations and panel discussions on different approaches to specific gynaecologic surgeries. Each presentation will be a twenty minute guided video followed by a fifteen minute panel discussion with knowledgeable faculty and interaction with the audience.

Course participants can register for the full program or different parts of the program (*see chart on the registration form*). Please note that we will only be taking thirty participants for the Hands on Workshop so please register early if you wish to participate in this aspect of the program.

Plan to join us what we plan to be a fun, creative and interactive learning experience that will enhance your surgery knowledge & skills.

We hope to see you in Toronto in May!
